## **Notes to the Unaudited Condensed Interim Consolidated Financial Statements**

### 1. NATURE OF OPERATIONS

kneat.com, inc. (the "Company" or "kneat.com" or "Kneat"), was incorporated on December 12, 2013 under the laws of the Canada Business Corporations Act. On June 27, 2016, the Company completed a transaction with Kneat Solutions Limited whereby kneat.com acquired 100% of the issued and outstanding ordinary shares of Kneat Solutions Limited by way of a scheme of arrangement in Ireland. The Company commenced trading on the TSX Venture Exchange as kneat.com on July 5, 2016 under the symbol KSI. kneat.com's head office is located at Unit 7, Castletroy Business Park, Castletroy, Limerick, Ireland. The registered office of kneat.com is located at Suite 2001, 1969 Upper Water Street, Halifax, Nova Scotia, Canada, B3J 3R7.

Kneat is in the business of developing and marketing a software application for modelling regulated data intensive processes for regulated industries, focusing on the life sciences industry.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these unaudited condensed interim consolidated financial statements, except as discussed below.

### a) Statement of compliance and basis of consolidation

The unaudited condensed interim consolidated financial statements of the Company and all its subsidiaries have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). The Board of Directors approved these unaudited condensed interim consolidated financial statements for issue on November 9, 2021.

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"), as issued by the IASB. Accordingly, certain information normally included in annual financial statements prepared in accordance with IFRS, as issued by the IASB, has been omitted or condensed. The unaudited condensed interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2020.

The policies applied in these unaudited condensed interim consolidated financial statements are based on IFRS as of November 9, 2021, the date the Board of Directors approved the unaudited condensed interim consolidated financial statements. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ended December 31, 2021 could result in the restatement of these unaudited condensed interim consolidated financial statements.

These unaudited condensed interim consolidated financial statements include certain assets, liabilities and results of operations of the Company, including the following subsidiaries:

Subsidiary	Principal Activity	Country of Incorporation
Kneat Solutions Limited	Operations	Ireland
Kneat Solutions Inc.	Operations	United States

The Company consolidates the wholly-owned subsidiaries on the basis that it controls these subsidiaries through its ability to govern their financial and operating policies.

These unaudited condensed interim consolidated financial statements have been prepared using the same policies and methods of computation as the annual consolidated financial statements of the Company for the year ended

## **Notes to the Unaudited Condensed Interim Consolidated Financial Statements**

December 31, 2020. Refer to note 2, *Summary of Significant Accounting Policies*, of the kneat.com, inc. annual consolidated financial statements for the year ended December 31, 2020 for information on the other accounting policies, critical accounting judgments and estimates.

### b) Foreign currency translation

Earnings of foreign operations are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The functional currency of Kneat Solutions Limited is the Euro and the functional currency of Kneat Solutions Inc. is the United States dollar. The legal parent entity, kneat.com, has a Canadian dollar functional currency. The unaudited condensed interim consolidated financial statements are presented in Canadian dollars. On consolidation assets and liabilities of each foreign entity are translated into Canadian dollars at the exchange rate in effect on the unaudited condensed interim consolidated statements of financial position date. Revenue and expenses are translated at the average rate in effect during the period. Unrealized translation gains and losses are recorded as a cumulative translation adjustment, which is included in other comprehensive loss, which is a component of shareholders' equity.

Foreign currency transactions are translated as follows: (i) monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the exchange rate prevailing at the unaudited condensed interim consolidated statements of financial position date; and (ii) non-monetary assets and liabilities denominated in foreign currencies and measured in terms of historic costs are translated using rates of exchange at the transaction dates.

### c) Share-based payments

The Company has an Omnibus Equity Incentive plan that allows for share-based compensation to be provided to stakeholders that can have a significant impact on the Company's long-term results. Awards of options under this plan are recognized based on the estimated fair value of the options at the grant date, with a corresponding credit to contributed surplus in equity. Fair value is estimated using the Black-Scholes pricing model. If the options are subject to a vesting period, the estimated fair value is recognized over this period on a graded vesting basis, based on the Company's estimate of the shares that will eventually vest. Option pricing models require the use of assumptions, including the expected volatility. The Company uses its historical price data in the estimate of future volatilities. Cash consideration received on the exercise of options is credited to share capital together with the amounts originally recorded as share-based compensation related to the exercised options.

Under the Omnibus Equity Incentive plan, DSUs may be granted to members of the Company's Board of Directors. DSUs typically vest over a three or four year period, will be settled through the issuance of common shares, and cannot be redeemed until the holder is no longer a director or officer of the Company. All services received in exchange for the grant of DSUs are measured at their fair values as of the date of grant with no subsequent revaluation. The fair value is recognized over the vesting period on a graded vesting basis. Compensation expense is classified consistent with directors' fees or salaries and is recognized over the vesting period in the consolidated statement of loss and comprehensive loss.

The Company calculates the fair value of warrants issued as part of fundraising activities at the date of issue taking the amount directly to equity where no cash settlement option exists and where a fixed number of warrants are issued at a fixed rate. The fair value is calculated using the Black Scholes model. Fair value, which is assessed at the grant date, is calculated on the basis of the contractual term of the warrants.

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

# Notes to the Unaudited Condensed Interim Consolidated Financial Statements

## d) New accounting standards adopted during the period

A number of new or amended standards became applicable for the current reporting period. The Company did not have to change its accounting policies or make retrospective adjustments as a result of adopting these standards.

#### 17. FAIR VALUE OF FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

### a) Capital management

The Company manages its capital to ensure that it will be able to continue as a going-concern while maximizing the return to stakeholders through the optimization of debt and equity balances.

The capital of the Company consists of items included in equity, net of cash, as follows:

	Sept 30, 2021	December 31, 2020
	\$	\$
Equity	34,681,660	19,214,120
Less: cash	(21,987,348)	(8,659,085)
	12,694,312	10,555,035

The Company manages its capital structure and makes adjustments in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may issue equity or return capital to shareholders. No changes were made to the objectives, policies or processes for managing capital during the nine-month period ended September 30, 2021 or the year ended December 31, 2020.

### b) Fair values of financial instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The carrying amounts reported in the unaudited condensed interim consolidated statements of financial position for cash, amounts receivable, and accounts payable and accrued liabilities, approximate their fair values based on the immediate or short-term maturities of these financial instruments. In addition, non-current amounts receivable and the loan payable, although not due in the current year, do not have fair values that differ significantly from their carrying values.

## Notes to the Unaudited Condensed Interim Consolidated Financial Statements

The table below presents the classification of the Company's financial assets and liabilities as at September 30, 2021 and December 31, 2020:

	Financial assets and liabilities at	Financial assets and liabilities at	
	amortized cost	amortized cost	
	Sept 30, 2021	Dec 31, 2020	
	\$	\$	
Financial assets:			
Cash	21,987,348	8,659,085	
Amounts receivable	10,386,547	5,832,811	
Financial liabilities:			
Accounts payables and accrued liabilities	3,184,435	1,546,863	
Loan payable	269,865	580,087	

### c) Financial risk management objectives

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk and interest rate risk. Where material, these risks are reviewed and monitored.

### d) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date. At September 30, 2021 and December 31, 2020, the Company's financial assets exposed to credit risk amounted to the following:

	September 30, 2021	December 31, 2020
	\$	\$
Cash	21,987,348	8,659,085
Amounts receivable*	7,862,662	3,366,955

<sup>\*</sup>includes trade debtors, contract assets, other debtors & prepayments

During the nine-month period ended September 30, 2021 and the year ended December 31, 2020, the Company did not hold any financial assets that were impaired. Trade debtors of \$6,864,628 are included in amounts receivable as at September 30, 2021 (December 31, 2020 – \$2,437,585). Trade debtors are monitored on a regular basis, with reference to the ECL impairment model, in order to minimize material aging and to ensure adequate collection.

Historically there have been no significant trade debtor collection issues and the Company does not believe it is subject to significant concentration of credit risk.

Cash is held with reputable banks in Canada, Ireland and the United States. The long-term credit rating, as determined by Standard and Poor's was A, BBB- and A respectively.

### e) Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they become due. The Company has a planning and budgeting process to monitor operating cash requirements, including amounts projected for capital expenditures, which are adjusted as input variables change.

## **Notes to the Unaudited Condensed Interim Consolidated Financial Statements**

These variables include, but are not limited to, the ability of the Company to generate revenue from current and prospective customers, general and administrative requirements of the Company and the availability of capital markets. As these variables change, liquidity risks may necessitate the need for the Company to issue equity or obtain debt financing.

In the normal course of business, the Company enters into contracts that give rise to commitments for future minimum payments. The following table summarizes the remaining contractual maturities of the Company's financial liabilities as at September 30, 2021:

	Within 1 year	2-3 years	4-5 years	Over 5 years	Total
	\$	\$	\$	\$	\$
Accounts payable and accrued liabilities	3,184,435	-	_	-	3,184,435
Lease payments	917,356	1,691,927	1,147,666	1,793,231	5,550,180
Loan payable	269,865	-	_	-	269,865
	4,371,656	1,691,927	1,147,666	1,793,231	9,004,480

The Company's operations to date have been financed through the sale of shares, issuance of debt, revenue generated from customers and research and development tax credits. The Company has incurred significant operating losses and negative cash flows from operations since inception and has an accumulated deficit of \$45,628,541 as at September 30, 2021. For the nine-month period ended September 30, 2021, the Company incurred a net loss of \$8,308,792 with negative cash flows from operations of \$258,059 and capitalized development cost spend of \$6,786,013 (2020 - \$4,105,943, \$978,732 and \$4,749,815, respectively). As the Company incurs losses and negative cash flow from operations, the Company has relied on financing activities to meet its working capital and operating requirements, including funds needed to further develop its software and expand its sales function. The Company has a history of being able to raise funds on the capital markets to meet its ongoing requirements and on April 28, 2021, the Company closed a public equity financing for gross proceeds of \$20,125,575 and a concurrent non-brokered private placement for gross proceeds of \$2,000,000 (note 11(a)). However, there can be no assurance that, in the future, the Company will be able to raise funding on favorable terms, if at all.

During 2020 and the first nine months of 2021, financial markets have been negatively impacted by the ongoing COVID-19 coronavirus pandemic. The continued spread of COVID-19 and the actions being taken by governments, businesses and individuals to limit this pandemic may adversely impact our operations, credit risk, our ability to serve our customers and our ability to raise new funding. This has resulted in significant economic uncertainty, and even though the Company has to date experienced no significant impact to its operations, any potential impact on our future financial results is difficult to reliably measure. The Company is regularly assessing the situation and remains in contact with its partners, customers and suppliers to assess any impacts and risk.

The Directors believe that the Company's cash resources, when combined with the proceeds from customer receipts, will be sufficient to fund operations for at least twelve months from the reporting date of the unaudited condensed interim consolidated financial statements. However, judgement is required to forecast cash flows over future periods. Management has the ability to reduce or delay certain cash outflows were it to be necessary.

### f) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk exposure arises from the Company entering into transactions which are denominated in currencies other than its functional currency.

The Company is exposed to currency risk on cash, intercompany balances, accounts payable and accrued liabilities balances, and the loan payable balance that are held in currencies that are not in the transacting entities functional currencies.

## **Notes to the Unaudited Condensed Interim Consolidated Financial Statements**

As at September 30, 2021, a 5% decrease in the exchange rate between the functional currencies and foreign currencies would increase the net loss by approximately \$3.1 million for the nine-month period ended September 30, 2021; a 5% increase would decrease the net loss by approximately \$3.1 million for the nine-month period ended September 30, 2021. The Company currently does not hedge its currency risk. The majority of the Company's revenues and expenses are denominated in Euro and the United States dollar. As a result, revenues and expenses are affected by a change in the value of the Euro and the United States dollar relative to the Canadian dollar. The following table summarizes the effects on revenues, expenses and the net loss as a result of a 5% strengthening of the Euro and the United States dollar when compared to the Canadian dollar: (1)

	Nine-month	period ended S	Sept 30, 2021	Nine-month	ept 30, 2020	
		Exchange			Exchange	
	As reported	rate effect	5% Stronger	As reported	rate effect	5% Stronger
	\$	\$	\$	\$	\$	\$
Revenues	9,238,312	461,915	9,700,227	4,459,343	222,967	4,682,310
Expenses	(17,547,104)	(753,867)	(18,300,971)	(8,565,286)	(477,990)	(9,043,276)
Net loss	(8,308,792)	(291,952)	(8,600,744)	(4,105,943)	(255,023)	(4,360,966)

<sup>(1)</sup> A 5% weakening of the Euro and the United States dollar when compared to the Canadian dollar would have an equal and opposite impact on the Company's revenues, expenses and net loss as presented in the table.

#### g) Interest risk

Interest risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market interest rates. An immaterial amount of interest rate exposure exists in respect of cash balances and the loan payable on the unaudited condensed interim consolidated statements of financial position. The Company holds a loan payable with a fixed interest rate. This is privately-issued, with no secondary market. It is measured at amortized cost. As a result, the Company is not exposed to cash flow interest rate risk on its loan payable.

### h) Fair value hierarchy

The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

At September 30, 2021 and December 31, 2020 the Company had no financial instruments that were measured and recognized on the unaudited condensed interim consolidated statement of financial position at fair value. In addition, there were no transfers between levels during the period.

	Three-month period ended Sept 20, 2021	Three-month period ended Sept 30, 2020	Nine-month period ended Sept 30, 2021	1
Numerator: Net loss for the year attributable to ordinary shareholders  Denominator:	(2,509,638)	(1,335,948)	(8,308,792)	(4,105,943)
Weighted average number of ordinary shares in issue	75,433,719	67,243,118	73,191,375	65,407,049
Loss per share (basic and diluted)	(0.03)	(0.02)	(0.11)	(0.06)

The Company's potential ordinary shares, which include stock options and warrants to purchase shares of common stock, have been excluded from the computation of diluted net loss per share as the effect would be to reduce the net loss per share. Therefore, the calculation of basic and diluted net loss per share is the same.

The Company excluded the following potential ordinary shares, presented based on amounts outstanding at each year end, from the computation of diluted net loss per share because including them would have had an anti-dilutive effect.

	September 30, 2021	September 30, 2020
Options to purchase common shares	2,949,351	3,519,251
Warrants to purchase common shares	370,900	539,245
