2. Summary of material accounting policies

a) Statement of compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"). Accordingly, certain information normally included in annual financial statements prepared in accordance with IFRS Accounting Standards ("IFRS"), as issued by the IASB, has been omitted or condensed. The unaudited condensed interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2023.

These unaudited condensed interim consolidated financial statements have been prepared using the same policies and methods of computation as the audited consolidated financial statements of the Company for the year ended December 31, 2023. Refer to note 2, Summary of Material Accounting Policies, of the kneat.com, inc. audited consolidated financial statements for the year ended December 31, 2023 for information on the other accounting policies, critical accounting judgements and estimates.

The Board of Directors approved these unaudited condensed interim consolidated financial statements for issue on May 8, 2024.

b) Use of judgement and estimates

The preparation of the Company's unaudited condensed interim consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed interim consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods.

Information about critical judgements in applying accounting policies and assumptions and estimation uncertainties that have the most significant effect on the amounts recognized in the unaudited condensed interim consolidated financial statements are disclosed in Note 2 of the audited consolidated financial statements as at December 31, 2023.

On June 26, 2023 the Company secured up to €15 million (\$21.9 million) in secured debt financing from IPF Partners (the "IPF Facility"). This new IPF facility consists of three term commitments or tranches of €5 million each to be availed of by Kneat Solutions Limited. The Company drew down the first, second and third tranches of the facility on June 30, 2023, September 22, 2023 and December 22, 2023, respectively. The first and second tranches mature on December 31, 2027 with the first principal payments to be made on March 31, 2025. The third tranche matures March 31, 2028, with the first principal payment to be made on June 30, 2025. Each of the facilities carries an annual cash interest of three-month EURIBOR + 7.0%, payable quarterly; and capitalized interest of 2.0%, accrued and capitalized quarterly, in addition to customary structuring and exit fees. The total cash cost of the arrangement is dependent on the final amount of the three facilities availed of and whether the debt is repaid on each maturity date or earlier. The IPF Facility is guaranteed by the Company and its U.S. wholly owned subsidiary, and is secured by a perfected, sole first-priority security interest in all existing and after acquired tangible and intangible assets of Kneat Solutions Limited, the Company and its U.S. wholly owned subsidiary. The IPF Facility is also subject to a financial covenant in the form of a minimum cash balance held in favour of the lender in an amount sufficient to cover the higher of the last six months and next six months cash runway subject to a cap of €2 million, €4 million and €6 million on tranche one, two and three, respectively. At March 31, 2024 the minimum cash balance to be held was €6 million \$8.7 million. The Company was in compliance with the financial covenant as of March 31, 2024.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may issue equity, return capital to shareholders or raise debt funding. In the year ended December 31, 2023, the Company signed the IPF Facility allowing for debt funding of up to \in 15 million (\$21.9 million) and drew down the first, second and third tranches of this facility on June 30, 2023, September 22, 2023 and December 22, 2023, respectively. The IPF Facility is subject to a financial covenant in the form of a minimum cash balance held in favour of the lender in an amount sufficient to cover the higher of the last six months and next six months cash runway subject to a cap of \in 2 million, \in 4 million and \in 6 million on tranche one, two and three respectively. At March 31, 2024 the minimum cash balance that the Company must maintain at all times is \in 6 million (\$8.7 million). On February 14, 2024, the Company closed a public equity financing with a syndicate of investment dealers led by Cormark Securities Inc ("the Underwriters"). Pursuant to the Offering, the Company issued a total of 6,153,880 common shares at a price of \$3.25 per common share for gross proceeds of \$20,000,110, which included the exercise, in full, by the Underwriters of the over-allotment option granted by the Company to purchase up to an additional 802,680 common shares at a price of \$3.25 per common share. No other changes were made to the objectives, policies or processes for managing capital during the three months ended March 31, 2024 or the year ended December 31, 2023.

b) Fair values of financial instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The carrying amounts reported in the unaudited condensed interim consolidated statements of financial position for cash, amounts receivable, the current portion of the loan payable, accounts payable and accrued liabilities, approximate their fair values based on the immediate or short-term maturities of these financial instruments. In addition, non-current amounts receivable and the non-current portion of the loan payable do not have fair values that differ significantly from their carrying values

b) Fair values of financial instruments (continued)

The table below presents the classification of the Company's financial assets and liabilities as at March 31, 2024 and December 31, 2023:

	Financial assets and liabilities at amortized cost March 31, 2024	Financial assets and liabilities at amortized cost December 31, 2023
Financial assets: Cash Trade & Other Debtors & Contract Assets	37,507,949 11,145,355	15,252,526 7,036,461
Financial liabilities:	11,145,555	7,030,401
Accounts payables and accrued liabilities Loan payable current	7,853,756 728,950	7,874,332
Loan payable non-current	21,048,866	21,657,423

c) Financial risk management objectives

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk and interest rate risk. Where material, these risks are reviewed and monitored.

d) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date. At March 31, 2024 and December 31, 2023, the Company's financial assets exposed to credit risk amounted to the following:

	March 31, 2024	December 31, 2023
	\$	\$
Cash	37,507,949	15,252,526
Amounts receivable and other*	11,145,355	7,036,461

^{*}includes trade debtors, contract assets & other debtors

During the three months ended March 31, 2024 and the year ended December 31, 2023, the Company did not hold any financial assets that were impaired. Trade debtors of \$10,986,290 are included in amounts receivable as at March 31, 2024 (December 31, 2023 – \$6,690,224).

Trade debtors are monitored on a regular basis, with reference to the Expected Credit Loss (ECL) impairment model, in order to minimize material aging and to ensure adequate collection. Historically there have been no significant trade debtor collection issues and the Company does not believe it is subject to significant concentration of credit risk.

d) Credit risk (continued)

Cash is held with reputable banks in Ireland, the United States and Canada. The long-term credit ratings of these banks, as determined by Standard and Poor's range between A+ and BBB.

e) Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they become due. The Company has a planning and budgeting process to monitor operating cash requirements, including amounts projected for capital expenditures, which are adjusted as input variables change.

These variables include, but are not limited to, the ability of the Company to generate revenue from current and prospective customers, general and administrative requirements of the Company and the availability of capital markets. As these variables change, liquidity risks may necessitate the need for the Company to issue equity or obtain debt financing.

In the normal course of business, the Company enters into contracts that give rise to commitments for future minimum payments. The following table summarizes the remaining contractual maturities of the Company's financial liabilities as at March 31, 2024:

	Within 1 year \$	2-3 years \$	4-5 years	Over 5 years	Total \$	Carrying Value \$
Accounts payable and accrued						
liabilities	7,853,756	-	-	-	7,853,756	7,853,756

^{*}includes principal and interest payments. Interest payable was calculated using the EURIBOR rate as of March 2024

The Company's operations to date have been financed through the sale of shares, issuance of debt, revenue generated from customers and research and development tax credits. The Company has incurred significant operating losses and negative cash flows from operations since inception and has an accumulated deficit of \$73,782,560 as at March 31, 2024. For the three months ended March 31, 2024, the Company incurred a net loss of \$3,336,861 with positive cash flows from operations of \$8,402,518 and capitalized development cost spend of \$4,504,500. (March 31, 2023 - \$2,474,357, \$2,602,992 and \$4,099,009, respectively). As the Company continues to incur losses from operations, the Company has relied on financing activities to meet its working capital and operating requirements, including funds needed to further develop its software and expand its sales and marketing functions.

On June 26, 2023 the Company announced that it had secured up to €15 million (\$21.5million) in secured debt financing. This new IPF facility consists of three term commitments or tranches of €5 million each to be availed of by Kneat Solutions Limited. Each tranche matures 18 quarters from its initial drawdown date. On June 30, 2023, September 22, 2023 and December 22, 2023 the Company drew down the first, second and third tranches, respectively. Refer to note 8.

16. Fair value of financial instruments and risk management (continued)

e) Liquidity risk (continued)

The Company has a history of being able to raise funds on the capital markets to meet its ongoing requirements and on February 14, 2024, the Company closed a public equity financing with a syndicate of investment dealers led by Cormark Securities Inc ("the Underwriters"). Pursuant to the Offering, the Company issued a total of 6,153,880 common shares at a price of \$3.25 per common share for gross proceeds of \$20,000,110, which included the exercise, in full, by the Underwriters of the over-allotment option granted by the Company to purchase up to an additional 802,680 common shares at a price of \$3.25 per common share. However, there can be no assurance that, in the future, the Company will be able to raise funding on favorable terms, if at all.

During the first quarter of 2024 and throughout 2023, financial markets have been negatively impacted by economic instability due to factors including the impact of international conflicts, rising inflation and interest rates. These factors may adversely impact our operations, credit risk, our ability to serve our customers and our ability to raise new funding. This has resulted in significant economic uncertainty, and even though the Company has to date experienced no significant impact to its operations, any potential impact on our future financial results is difficult to reliably measure. The Company is regularly assessing the situation and remains in contact with its partners, customers and suppliers to assess any impacts and risk.

The Directors believe that the Company's cash resources when combined with the proceeds from customer receipts, will be sufficient to fund operations for at least twelve months from the reporting date of the unaudited condensed interim consolidated financial statements.

f) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk exposure arises from the Company entering into transactions which are denominated in currencies other than its functional currency.

The Company is exposed to currency risk on its cash balances, amounts receivable, loan payable, intercompany balances and accounts payable and accrued liabilities that are held in currencies that are not in the transacting entity's functional currencies.

As at March 31, 2024, the impact on monetary assets and liabilities of a 5% decrease in the exchange rate between the functional currencies and foreign currencies (weakening of the Euro/USD versus CAD) would increase the net loss by approximately \$2.5 million; a 5% increase would decrease the net loss by approximately \$2.5 million (strengthening of the Euro/USD versus CAD). The Company currently does not hedge its currency risk.

The majority of the Company's revenues and expenses are denominated in Euro and the United States dollar. As a result, revenues and expenses are affected by a change in the value of the Euro and the United States dollar relative to the Canadian dollar. The following table summarizes the effects on revenues, expenses and the net loss as a result of a 5% strengthening of the Euro and the United States dollar when compared to the Canadian dollar: (1)

	_	Three months ended March 31, 2024 Exchange rate			Three months ended March 31, 2023 Exchange rate		
		As reported	effect	5% Stronger	As reported	effect	5% Stronger
		\$	\$	\$	\$	\$	\$
Revenue		10,767,000	538,350	11,305,350	7,964,908	398,245	8,363,153
Expenses		(14,103,861)	(688,291)	(14,792,152)	(10,439,265)	(533,521)	(10,972,786)
Net loss	_	(3,336,861)	(149,941)	(3,486,802)	(2,474,357)	(135,276)	(2,609,633)
	(1) 4 50	/ 1 ' C.1 E	1.1 11 1.10	4 1 11 1	1, 1, 0, 1, 1	11 1.1.1	1 1 1

⁽¹⁾ A 5% weakening of the Euro and the United States dollar when compared to the Canadian dollar would have an equal and opposite impact on the Company's revenues, expenses and net loss as presented in the table.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements

16. Fair value of financial instruments and risk management (continued)

g) Interest risk

Interest risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market interest rates. Interest rate exposure exists in the unaudited condensed interim consolidated statements of financial position, in respect of cash balances due to the variability in deposit rates and in respect of the IPF Facility due to the variable interest rate (EURIBOR + 7%) that applies to this loan. During the three months ended March 31, 2024, a change of 100 basis points in either interest rate would have had an effect of approximately \$10,000 on deposit interest income and \$58,000 on interest expense assuming all other variables, in particular foreign currency exchange rates, remain constant.

h) Fair value hierarchy

The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

At March 31, 2024 and December 31, 2023 the Company had no financial instruments that were measured and recognized at fair value on the unaudited condensed interim consolidated statement of financial position and audited consolidated statement of financial position, respectively. In addition, there were no transfers between levels during the period.

17. Loss per share

Basic and diluted net loss per share was calculated as follows:

	Three-month period ended March 31, 2024	Three-month period ended March 31, 2023
Numerator:		
Net loss for the period attributable to ordinary shareholders	(3,336,861)	(2,474,357)
Denominator:		
Weighted average number of ordinary shares in issue	81,005,029	77,686,689
Loss per share (basic and diluted)	(0.04)	(0.03)

The Company's potential ordinary shares, which include stock options to purchase shares of common stock, DSUs and RSUs, have been excluded from the computation of diluted net loss per share as the effect would be to reduce the net loss per share. Therefore, the calculation of basic and diluted net loss per share is the same. The Company excluded the following potential ordinary shares, presented based on amounts outstanding at each period end, from the computation of diluted net loss per share because including them would have had an anti-dilutive effect.

	March 51, 2024	March 51, 2025
Options to purchase common shares	1,736,840	2,779,187
Deferred share units (DSUs)	616,030	536,151
Restricted share units (RSUs)	1,692,953	2,339,175

March 21 2024

March 21 2022

18. Commitments and contingencies

The Company is from time to time involved in various claims, legal proceedings and complaints arising in the ordinary course of business. The Company does not believe that adverse decisions in any pending or threatened proceedings related to any matter, or any amount which it may be required to pay by reason thereof, will have a material effect on the financial conditions or future results of operations of the Company.

The Company has committed to purchase certain services which will result in the Company paying \$790,327 within one year and \$282,137 in two to three years.

The Company has employment arrangements with the Chief Executive Officer, Chief Information Officer, Chief Product Officer and Chief Financial Officer which provide that, should a change in control event occur, as defined in the employment arrangements, these individuals will receive lump sum payments equal to 24 months of their then current base salary.

19. Subsequent events

The Company performed a review of events subsequent to the unaudited condensed interim consolidated statements of financial position date through to the date the unaudited condensed interim consolidated financial statements were issued and determined that there were no such events requiring recognition or disclosure in the financial statements.
